

## Precipice of Change: "I Heart Kakaako"

A group of students from the MPSA media arts program at Mid-Pacific Institute spent a day exploring Kaka'ako. Students learned about history, art and impending change. This show is the result of their efforts and serves as a document of the ephemeral present.

The word Kaka'ako means "dull" or "slow;" however, the area is home to a vibrant amalgam of people, businesses and industries. Change is constant, and the Kaka'ako we know and experience will soon undergo a significant face-lift. The energy of expectation emanates - though no one can truly foresee the results, the pregnant anticipation felt throughout the neighborhood is a fleeting and beautiful moment in time.
